

WoundRounds® Fact Sheet

About the company

The vision for WoundRounds was conceived in 2005 by our physician founders and was crafted by our wound care nurses who share the passion for improving wound care.

Our mission is to set a new standard for wound care management and risk prevention, delivering measurable results to healthcare providers, payors, and individuals: better care for patients, better health for the population, and lower cost through performance improvement.

WoundRounds is a point-of-care mobile health and analytics platform designed to prevent and manage chronic wounds by empowering nurses to deliver better wound care in less time.

Management

- Michael Bautsch, Chief Information Officer
- Rhett Gustafson, Executive Vice President, Finance
- Anne Scheurich, BS, RN, CWOCN, VP of Clinical Operations
- Cory Fosco, VP Sales

About WoundRounds

WoundRounds is the leading solution for wound management and risk prevention. Post acute care facilities in 32 states and Canada use WoundRounds at the bedside to automate wound care management and reporting, coordinate care in real time, and share outcomes data with members of the care team.

WoundRounds puts mobile technology in the hands of nurses to capture clinical data and images at the bedside, on smart phones or tablets, and uploads data to cloud-based servers. Information is shared with the clinical team to deliver better-coordinated care for the management and prevention of wounds.

WoundRounds empowers nurses to deliver better wound care in less time. WoundRounds customers report more wound patient referrals, lower overall costs of care, improved healing rates, lower return-to-hospital rates, and reduced risk and liability. Learn more about WoundRounds, see:
